

Fuse resistors are used to improve safety. When replacing them with new ones, be sure to use the designated type. Always use the designated fuse without fail.

Q706 and Q707 are used as a (L) or (M) grade pair. As the service parts are prepared to (L) grade only, when replacing (M) grade with new one, be sure to use Q706, 707 to the same (L) grade each channel.
